

Welcome on Credit card payment solutions.

Our objectives are to provide payment solutions to simplify the integration of credit card payment into your shopping cart system using the most popular belgium payment service provider.

There are very few Payment System Providers present in Belgium and our company has a partner ship agreement with ClearPark to re-sales their solutions, provide merchant account and integrate their Payment Solutoin into specific eCommerce solutions.

There are multiple eCommerce solutions and among them we have selected:

- Virtuemart for joomla
- OSCommerce

For those eCommerce solutions, we are providing payment module or method that use ClearPark as PSP.

We have also developped a very low cost Payment System for DEXIA bank.
