

A first release candidate is successfully released.

We conducted tests with ClearPark and results were excellent.
We are finalizing the packaging before requesting ClearPark certification.
The tests were performed with Joomla 1.5 and VirtueMart 1.1.

We expect proposing a commercial version of our product by 13 May 2008.

Three versions of the product using the FORM Based (like PayPal) will be available.

1. **Entry** edition will use a very basic button that will only allow Credit-Card payment.
No configuration interface will be provided.
With the manual, the user will be guided to modify the ClearPark information.
2. **Basic** edition will provide a configuration interface to simplify ClearPark settings.
3. **Extended** edition is an extension of basic edition that is a multi-site payment processing.
It allows using a single ClearPark merchant account for multiple websites.
